

Cody Rodgers

Software Engineer

contact@codrod.dev • codrod.dev • github.com/codrod

Backend: ASP.NET Core, Node.js, REST APIs, EntityFramework (ORM)

Frontend: Next.js (React.js), HTML5, CSS3, SASS, Bootstrap, Webpack

DevOps: Microsoft Azure, Docker, Terraform (IaC), Azure DevOps (CI/CD)

Databases: SQL Server, MongoDB

Tools: Git, Jira, Selenium, Bash, PowerShell, Linux

Languages: C#, Java, JavaScript, TypeScript, C, Python

Architecture: Microservices, Distributed Systems, REST APIs, OOP, Design Patterns

Professional Experience

Caregiving

Career Break

April 2025 - March 2026

Stepped away from professional responsibilities to provide **full-time care for a terminally ill family member**; now fully available and focused on returning to a full-time engineering role.

Software Engineer III

RDA Corporation - Baltimore, MD, USA

September 2019 – March 2025

- Promoted from Software Engineer I→II→III based on performance and technical impact
- Designed **scalable RESTful APIs and microservices** in ASP.NET, supporting 1M+ monthly users
- Modernized a legacy web application to use **Next.js and SSG**, reducing page load times by ~20%
- Migrated an on-prem application to Azure cloud, improving reliability and scalability, by implementing **Docker containers and Terraform infrastructure-as-code**
- Reduced deployment to minutes and eliminated manual errors, by implementing **CI/CD pipelines** in Azure DevOps
- Increased defect detection rate by implementing **automated end-to-end testing** using Selenium
- Delivered features across multiple concurrent projects, by collaborating with **cross-functional stakeholders in Agile environments**

Teaching Assistant

Temple University - College of Science and Technology

August 2018 – June 2019

- Mentored students in web development, by **providing hands-on instruction**
- Enhanced course effectiveness, by **updating course material** to align with modern web development practices

Technical Support Specialist

Temple University - IT Services

September 2016 – March 2018

- Provided technical support by diagnosing and **resolving hardware, software, and network issues**
- Reduced issue resolution time by efficiently prioritizing and **managing concurrent technical support requests**

Education

Bachelor of Science, Computer Science

Temple University, College of Science and Technology

2019
